Slides 1 - The Investment Environment

1.	a.	Securities are
		assets secured by some collateral
		 secure locations to store items of value
		tradable financial assets
		tradable physical assets
		Securities are tradable financial assets. They are issued by companies or governments and represent a financial claim on the resources of the issuer.
2.	a.	What are types of financial assets (securities)?
		Check all that apply:
		☑ Derivatives
		☐ Real estate
		✓ Stocks
		Securities include bonds, stocks and derivatives. Real estate, on the other hand, is an investment in real property.
3.	a.	assets are used to produce products or services, while assets are claims on real assets or on the cash flows they produce.
		○ Financial; real
		O Financial; tangible
		Real; financial
		 Tangible; real
		Real assets are used to produce products or services, while financial assets are claims on real assets or on the cash flows they produce.
		Real assets produce real products or services, thus increasing wealth. Financial assets, on the other hand, determine how the additional income or wealth are distributed between investors.
4. 8	a.	Which of the following are real assets?
		Check all that apply:
		☐ Corporate bond
		✓ Machine
		✓ Plot of land
5.	a.	Which of the following are financial assets?
		Check all that apply:
